

ICT-Energy PhD Forum 2014, Barcelona (Spain)

Call for Submissions

The PhD forum is a part of ICT-Energy workshop (2014). This forum is a great opportunity for PhD students to present their thesis work to a broad audience in the community from "Toward Zero-Power ICT" (ZEROPOWER) and the novel "MINECC" (Minimising energy consumption of computing to the limit) both industry and academia. The forum may also help students to establish contacts for entering into research related minimization of energy from various layers. In addition, representatives from industry and academia get a glance of state-of-the-art in this energy minimization field.

Eligibility

The following two classes of students are eligible:

1. Students who are close to finishing or 2nd year in their thesis work.
2. Students within partner institutions of ICT-Energy consortium and MINECC projects associated in ICT-Energy consortium.

Benefits

- A presentation (25 mins) at the PhD Forum
- Contacts to professionals from industry and academia
- Possibility to publish the extended abstract in the ICT-Energy newsletters and website

Submission

Submissions need to contain

- The full contact address, with affiliation, phone, e-mail
- A 2-page extended abstract describing the novelties and advantages of the thesis work of not more than 1600 words (PDF). The abstract should also include name and affiliation. Figures may be included as far as the 2-page limit is not exceeded.

Important dates

- Submission deadline: April 7th, 2013
- Notification of acceptance: April 10th, 2013
- Presentation at PhD Forum: April 24th, 2014
